DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2, 4, 5, 6, 14-16, 26, 30, 34 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Sorimachi et al (4,867,570).

The teachings of Sorimachi et al read on claims 26, 4-6, 30 and 34-35; for example, Sorimachi et al discloses a distance measuring device using triangulation method comprises a sensor has at least one measuring channel (W_2 , 4) between the transmission unit (W_2) and a reception unit (4) wherein the sensor has at least one additional channel (W_1 , 4) which has a further transmission unit (W_1) and the reception unit (4) (figures 1,10, 11).

Regarding claims 14-19, see column 5, line 55 through column 6, line 1, for the different between D_1 and D_2 .

Allowable Subject Matter

3. Claims 7-12, 27-29, 31-33 and 36 are allowed.

Response to Arguments

4. Applicant's arguments filed 9/11/03 have been fully considered but they are not persuasive.

Applicant's remarks, page 12, argues that the references do not teach the step of "expanding the second sensing rays and directing the expanded second sensing rays onto the measuring region to form an expanded sensing zone". However, this limitation is broad enough to read on the teaching of the reference, for example, figure 8 of Sorimachi et al teaches that the second light rays from W5 is expanded onto the measuring region (6). Thus, applicant's argument on claims 26 and 30 is not deemed to be persuasive.

5. The following is a statement of reasons for the indication of allowable subject matter: The cited references do not teach or suggest steps "determining from the signals ... at least one additional criterion" and "using the distance value as the measure of the object distance if additional criterion is fulfilled" in claims 27 and 36, also steps of "respectively determining forof the transmission unit" and "using a distance between mutually ... for the object distance" as now claimed in claims 28 and 29.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
